Beauty That Stands the Test of Time

A beautiful shower enclosure should look as impressive years from now as it does today. *Clarvista*® glass helps make that possible. Its durable protective coating resists the dulling effects of heat and humidity, keeping the glass sparkling and clear long into the future.

Designed for Modern Elegance

Clarvista® glass complements today's seamless shower designs with lasting clarity and subtle sophistication. The smooth, fused-on coating adds an invisible layer of protection that makes cleaning quick and easy.

Restoring its Brilliance is Easy

Non-abrasive, off-the-shelf cleaners can be used on *Clarvista*® glass without diminishing or damaging *Clarvista*®'s protection. For best results squeegee after every use.

Beautiful, Durable, Hassle-Free

Clarvista® glass doesn't just look great—it works hard, too. Its super-smooth, durable coating forms a protective barrier that helps the glass stay cleaner longer, making it easy to maintain.

Clarvista® Glass Coating on Clear Glass by Vitro

Lets the natural beauty of standard clear glass shine through.

Clarvista® Glass Coating Starphire Ultra-Clear® Glass by Vitro

Preserves the brilliance and transparency of *Starphire Ultra-Clear*® glass without changing its appearance.

Clarvista® Glass

Lasting Performance Backed by Science

Clarvista® glass has been lab-tested for long-term exposure to heat, humidity, scratches, and chemicals—and it outperforms both uncoated and other treated shower glass. It stays clearer, longer, and stands up to daily use with lasting durability.

Clarvista® Glass on low-iron glass

1,000 hours

Conventional low-iron glass

125 hours

After accelerated weather test that simulates years of exposure to heat and humidity.
